

HG

SERVICE ENGINEER for washer, dishwasher, etc.

A powdered cleaner to remove build-ups from limescale, rust stains, soap deposits and dirt, that have settled on the inside of the machine, therefore creating extra wear, and makes cycles run longer, but also reducing temperatures by settling on heating elements. Service Engineer will also keep filters, floaters, drainage pipes and other hard to reach surfaces clean. Resolves and prevents malfunctions.

APPLICATION

to clean and dissolve limescale and other deposits in washing machines and dishwashers

Washing Machines: 2 cleanings

Dishwasher Machines: 4 cleanings

DIRECTIONS FOR USE

Dishwasher: remove all cutlery, dishes, pots and pans. Fill the soap tray to the top (approx. 50 ml.). Set the program at highest temperature (approx. 65C), close door, and run full cycle.

Washing Machine: ensure that all laundry is removed. Fill the main washing tray with the full contents of 1 bottle of Service Engineer. Do NOT add any other products. Set program for "coloured wash" at approx. 60C, and run full cycle un-interrupted, including spin cycle.

SIZES AVAILABLE

6 x 2's (each 100 gr.)

order # 248-020

PRODUCT INFORMATION

crème powder	
relative density	1.21 g/ml
pH	approx. 13
compositions	anionics, nonionics, sodium hydroxide
biodegradable	yes

CAUTION
